Portfolio: <https://uzma272004.github.io/uzma-tech-portfolio/>

Carrier Objective

Artificial Intelligence & Data Science graduate with hands-on experience in Data Analytics, Machine Learning, and Artificial Intelligence. Proficient in Python, SQL, Power BI, and Excel for data cleaning, exploratory data analysis (EDA), statistical analysis, KPI reporting, dashboard development, and business intelligence. Experienced in developing AI-powered applications using Ollama (Local LLMs) and Claude AI API, applying machine learning and NLP to solve real-world problems. Skilled at transforming complex data into actionable insights that support informed business decisions.

Skills

- Programming Languages: Python, SQL
- Python Libraries: Pandas, Numpy, Matplotlib
- AI & ML: Machine Learning, NLP, Ollama(Local LLMs), Claude AI API
- Data Visualization Tools: Power BI, Microsoft Excel(Pivot Tables, XLOOKUP, VLOOKUP)
- Power BI Skills: DAX, Power Query, Data Modeling, Dashboard Development
- Data Analytics Concepts: Data Cleaning, Exploratory Data Analysis (EDA), KPI Reporting, Data Visualization, Business Intelligence, Statistical Analysis
- Database: MySQL
- Web Technologies: HTML, CSS, JavaScript

Experience

AI Engineer Intern(Trainee)

WizzyBox Private Limited | July 2026 – Present

- Completed training in Python, Artificial Intelligence, and Data Science with hands-on assignments and practical exercises.
- Applied Python programming and problem-solving skills to perform data handling, automation, and analytical tasks.

Data Science Intern(Remote)

AENEXZ Tech Private Limited| November/2025 to January/2026

- Performed data cleaning and analysis on structured datasets using Python and SQL, ensuring high accuracy in reporting outputs
- Built visualization dashboards in Power BI and Excel to present actionable business insights

Projects

Retail Sales & Customer Analytics Dashboard | Python, SQL (MySQL), Power BI

GitHub: <https://github.com/Uzma272004/Retail-Sales-Analytics.git>

Domain: Data Analytics / Business Intelligence

- Built an end-to-end retail sales analytics solution by cleaning, transforming, and analyzing 51K+ sales records using Python, SQL, and Power BI.
- Developed an interactive Power BI dashboard with KPIs, sales trends, category-wise, regional, customer, and

product performance analysis for business insights.

- Performed Exploratory Data Analysis (EDA) and SQL-based reporting to identify sales patterns, customer behavior, and profitability trends.

Technologies Used: Python, Pandas, NumPy, SQL (MySQL), Power BI, Microsoft Excel, Git, GitHub

Cognexa AI – Privacy-First Local LLM Assistant | HTML, CSS, JavaScript, Ollama REST API

GitHub: <https://github.com/Uzma272004/Cognexa-AI.git>

Domain: Artificial Intelligence / Generative AI

- Developed a privacy-first AI assistant using Ollama REST API to enable secure, offline interaction with multiple Large Language Models (LLMs) and real-time response streaming.
- Built a responsive chat application with multi-model support, persistent chat history, Markdown rendering, syntax highlighting, and file upload capabilities for an enhanced user experience.
- Integrated advanced AI features including Speech Recognition, Text-to-Speech, and vision-based image analysis (Llava) while ensuring complete client-side data privacy using Local Storage.

Technologies Used: HTML5, CSS3, JavaScript (ES6), Ollama, REST API, Web Speech API, Local Storage, Git, GitHub

Fake Job Posting Detection System | Python, NLP, FastAPI, PostgreSQL

GitHub: <https://github.com/Uzma272004/fake-job-detection.git>

Domain: Artificial Intelligence / Data Science

- Developed an AI-powered fraud detection system using NLP and ensemble learning, achieving ~90% accuracy across real-world job datasets..
- Combined a rule engine, TF-IDF similarity, and external verification for multi-layer fraud detection, reducing false positives by ~25%.
- Designed FastAPI REST APIs with JWT authentication and PostgreSQL integration, enabling real-time analysis (<2 sec response).

Technologies Used: Python, NLP, TF-IDF, Ensemble Learning, FastAPI, Streamlit, PostgreSQL, JWT Authentication, Git

Offline Exam Lab | React, TypeScript, Tailwind CSS

GitHub: <https://github.com/Uzma272004/Offline-Exam-Lab>

Domain: EdTech / Assessment Management System

- Developed an offline examination platform with test creation, timed exams, and automated result generation.
- Built a responsive React-based interface featuring question navigation, timer, progress tracking, and performance analytics.
- Implemented student dashboards to monitor scores, accuracy, and subject-wise performance.

Technologies Used: React, TypeScript, Tailwind CSS, Vite, React Router, Local Storage, Git, GitHub

Education

Bachelor of Engineering (B.E) in Artificial Intelligence & Data Science

Government Engineering College, Nargund 2022–2026

CGPA:8.4

Certifications

- Deloitte Data Analytics Job Simulation (Forage)
- IBM Python for Data Science
- Artificial Intelligence Certificate
- British Council English and Communication Certificate
